

Halászbástya

A jewel of the Buda Castle District, Fishermen's Bastion (Halászbástya) no longer serves as a means of protection - if not for the breathtaking view of Budapest. The freshly remodelled Halászbástya Restaurant is a classically elegant venue for dining out. The magnificent rooms, the enchanting panoramic view and the high level service is arguably the perfect choice for grand moments in life. Past

revived: the impressively furnished historic atmosphere makes each minute special. The beautiful circle view is most impressive on the less formal Terrace, seating 250. At this breezy, shady location local specialities are served, but light, classical dishes of the international cuisine are also offered. The fast service and the beautiful open-air location make even a coffee a true experience.
